CLEANER & PROCESS AIDS

www.swhotmeltglue.com

CLEAN-100

For the removal of dirt and burned adhesive residues from melting tanks, glue pots, and coating equipment.

Effectively cleans adhesive residues from glue pots and coating rollers. Easy to melt and use, helping maintain smooth operation and extend equipment service life.

PUR-100

For flushing PUR hot melt application systems and removing PUR adhesive remnants from hoses, melters and application nozzles.

Effectively removes PUR adhesive residues from hoses, melters and nozzles. The blue color allows easy identification for efficient cleaning and maintenance.

SEPERATING AGENT

- Applied via spray nozzle system before trimming to create a protective barrier on panel surfaces during edge-banding.

- Creates a temporary protective film to prevent adhesive residue and improve processing efficiency.

CLEANING AGENT

- Applied via an automatic spray nozzle system before buffing wheels or scrapers to remove adhesive residues and processing agents.
- Improves surface finish while cooling the edgeband and glue line for cleaner edges and better panel quality.

DISTRIBUTION NETWORK

- North America (United States, Mexico)
- South America (Peru, Chile, Ecuador, Argentina)
- Europe (Spain, Turkey, Russia)
- the Middle East (Saudi Arabia, UAE)
- Central Asia (Kazakhstan, Uzbekistan)
- South Asia (India, Pakistan, Sri Lanka)
- Southeast Asia (Vietnam, Indonesia, Thailand)
- Africa (Nigeria, South Africa, Egypt)
