PROFILE WRAPPING & LAMINATION

www.swhotmeltglue.com

Profile wrapping **(EVA/ PO & PUR hot melt)**

- A wide variety of decorative papers, CPL, and veneers are used for wrapping window and door frames. Free Bird Adhesives offers EVA, PO, and PUR adhesive solutions for a smooth and reliable wrapping process.

FREE BIRD 8630A

- ✓ For wrapping profiles and frames made of solid wood, particleboard or MDF, with veneer and CPL in manufacturing of window and door frames.
- 💰 Provide superior bonding with good heat and solvent resistance. Clear melting with an odor-free formula.

FREE BIRD 873N

- ✓ For wrapping window and door profiles and frames made of solid wood, particleboard or MDF, with veneer and CPL.
- 💰 Polyolefin hot melt adhesive provides excellent adhesion with enhanced heat and solvent resistance. Clear melting with an odor-free formula.

PUR6632

(PROFILE-WRAPPING)

✓ Moisture-cured polyurethane hot melts, designed for wrapping wood, metal, plastic profiles with PVC, CPL, veneer, decor paper, etc.

💰 Provides strong initial and final adhesion with moderate open time for reliable bonding in various environments.

Lamination (PUR hot melt)

- The wide range of material combinations and high quality requirements call for high-performance adhesives. Free Bird Adhesives offers PUR adhesives for smooth and reliable lamination.

PUR8667 (LAMINATION)

✓ For lamination of PVC, PET, paper, aluminum film, on melamine board, multi-layer board, crust board, carbon board, etc.

💰 Provides strong initial and final adhesion, compatible with a variety of materials in various environments, with excellent surface finish.

DISTRIBUTION NETWORK
